PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack development, AI integration, and real-time systems. Proficient in Python, C++, JavaScript, SQL, React.js, Node.js, MongoDB, and MySQL; experienced in building end-to-end applications, REST services, and AI-integrated products.

EDUCATION

Indian Institute of Information Technology, Guwahati Aug 2023 – Jul 2027
B.Tech — Computer Science and Engineering

EXPERIENCE

National Institute of Technology, Tiruchirappalli — Project Intern Jun 2026 – Jul 2026
Dept. of Computer Applications | MERN · Socket.IO · WebRTC · Gemini API · Cloudinary | github.com/K-K-R157/SmartConvo

- Designed and developed SmartConvo, a full-stack multilingual communication platform with real-time one-to-one messaging, presence, typing indicators, and read receipts using 10+ Socket.IO event types.
- Implemented native WebRTC and Stream Video SDK calling with Socket.IO signaling; integrated Gemini for smart replies and translation across 14 languages.
- Added Cloudinary uploads, voice-to-text, JWT auth with bcrypt, and cursor-based infinite scrolling (50 messages/batch) using Zustand and React Query.

DailyKaam — Software Development Engineer Intern Jan 2026 – Mar 2026
Kanpur, Uttar Pradesh | MongoDB · Express.js · React.js · Node.js

- Completed a software development internship focused on full-stack web application development using the MERN stack.
- Developed responsive user interfaces and integrated frontend and backend components through REST APIs.
- Worked on database operations, authentication, and application functionality testing while contributing to development tasks.

PROJECTS

OnRoad — Roadside Assistance Platform Nov 2025
MERN · Socket.IO · Google Maps API · JWT · MongoDB Atlas | github.com/K-K-R157/onroad

- Developed a full-stack emergency assistance platform supporting mechanic, fuel, and EV charging services with a unified admin dashboard.
- Implemented location-based provider discovery using MongoDB 2dsphere indexes and geospatial near queries to rank nearby providers by distance.
- Built real-time tracking and live navigation using Socket.IO, Geolocation API, and Google Maps API with JWT authentication and 5-role RBAC.

Smart Traffic Signal Automation Apr 2026
React.js · Flask · MySQL · Socket.IO · Tailwind CSS | github.com/K-K-R157/Traffic-Signal-Automation

- Developed a real-time traffic-management platform with a React and Tailwind CSS dashboard for visualizing vehicles, queue lengths, and signal states at a simulated four-way intersection.
- Integrated React with a Python/Flask backend using Socket.IO for live state updates and REST APIs for control commands; implemented authentication, RBAC, and MySQL-based violation storage.
- Designed emergency-vehicle preemption using FCFS and Round Robin scheduling and implemented controls for signal override, emergency priority, simulation management, and audit monitoring.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

Flipkart GRiD 7.0: National Semi-Finalist (Aug 2025)
Team Lead: Entropy 2024, Annual Technical Fest, IIIT Guwahati (2024)
LeetCode: 200+ problems solved | Rating: 1450+ | Arrays, Trees, Graphs, DP, Sliding Window | Profile
GFG / Coding Ninjas: 150+ problems | Recursion, Sorting, Backtracking, Bit Manipulation | GFG | Code360

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, SQL
Frameworks: React.js, Node.js, Express.js, Flask, Tailwind CSS, Zustand, React Query
Databases: MySQL, MongoDB, MongoDB Atlas, Mongoose, Geospatial Queries
Tools & APIs: Socket.IO, WebRTC, REST APIs, JWT, Google Maps API, Gemini API, Cloudinary, Git, GitHub
Concepts: Data Structures & Algorithms, OOP, DBMS, Full-Stack Development, MVC Architecture, RBAC, Operating Systems, Real-Time Systems
