PROFESSIONAL SUMMARY

Computer Science undergraduate at IIIT Guwahati with hands-on experience in full-stack web development, REST APIs, databases, real-time applications, and AI integration. Proficient in Python, C++, JavaScript, SQL, React.js, Node.js, Express.js, MongoDB, and MySQL. Experienced in developing MERN-stack applications, integrating AI APIs, implementing authentication, and building location-aware and real-time systems. Interested in software engineering, data engineering, and AI-enabled application development.

EDUCATION

Indian Institute of Information Technology, Guwahati Aug 2023 – Jul 2027
B.Tech – Computer Science and Engineering CPI: 7.49

EXPERIENCE

Software Development Engineer Intern – DailyKaam Jan 2026 – Mar 2026
MERN Stack · MongoDB · Express.js · React.js · Node.js

- Completed a software development internship focused on full-stack web application development using the MERN stack.
- Developed responsive user interfaces and integrated frontend and backend components through REST APIs.
- Worked on database operations, authentication, and application functionality testing while contributing to development tasks.

Project Intern – Department of Computer Applications, NIT Tiruchirappalli Jun 2026 – Jul 2026
SmartConvo · MERN Stack · Socket.IO · WebRTC · Gemini API

- Designed and developed SmartConvo, a real-time multilingual chat and video application with messaging, online presence, typing indicators, and read receipts.
- Implemented video calling using WebRTC and the Stream Video SDK, with Socket.IO signaling for exchanging offers, answers, and ICE candidates.
- Integrated Google Gemini for smart replies and translation across 14 languages; implemented Cloudinary uploads, voice-to-text input, and JWT authentication with bcrypt password hashing.
- Implemented cursor-based message pagination and managed application state using Zustand and React Query.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, SQL
Frameworks: React.js, Node.js, Express.js, Flask, Tailwind CSS
Databases: MongoDB, MongoDB Atlas, MySQL, Mongoose, Geospatial Queries
Tools & APIs: Socket.IO, WebRTC, REST APIs, JWT, Google Maps API, Gemini API, Cloudinary, Git, GitHub, Zustand, React Query
Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, MVC Architecture, RBAC, Real-Time Systems

PROJECTS

OnRoad – Roadside Assistance Platform Nov 2025
MERN · Socket.IO · Google Maps API · MongoDB Atlas · JWT

- Developed a full-stack emergency assistance platform supporting mechanic, fuel, and EV charging services with a unified admin dashboard.
- Implemented nearby provider discovery using MongoDB 2dsphere indexes and geospatial queries to identify providers based on location.
- Built real-time tracking and live navigation using Socket.IO, the Geolocation API, and Google Maps API; implemented authentication and five-role RBAC.

Smart Traffic Signal Automation Apr 2026
React.js · Flask · MySQL · Socket.IO · Tailwind CSS

- Developed a real-time traffic management dashboard to visualize vehicles, queue lengths, and signal states at a simulated four-way intersection.
- Integrated React with a Flask backend using Socket.IO for live updates and REST APIs for control commands; implemented authentication, RBAC, and MySQL-based violation storage.
- Designed emergency-vehicle preemption using FCFS and Round Robin scheduling, with controls for signal override, emergency priority, and simulation management.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

Flipkart GRID 7.0: National Semi-Finalist Aug 2025

LeetCode: 200+ problems solved | Rating: 1450+ | Arrays, Trees, Graphs, DP, Sliding Window
leetcode.com/kundankumar1231

GeeksforGeeks / Coding Ninjas: 150+ problems solved | Recursion, Sorting, Backtracking, Bit Manipulation
GeeksforGeeks | Coding Ninjas Code360

LEADERSHIP

Team Lead – Entropy, Annual Technical Fest, IIIT Guwahati 2024

- Led a team of 8 volunteers coordinating 3 events, scheduling, logistics, and onboarding for 200+ attendees.
